West Virginia

	VAPOR INTRUSION SCREENING LEVELS (μg/m³) 1,2			
	Sub-Slab Residential	Sub-Slab Industrial/Commercial	Indoor Air Residential	Indoor Air Industrial/Commercial
Benzene	12	52	0.36	1.6
Tetrachloroethylene	360	1,600	11	47
Trichloroethylene	16	100	0.48	3.0
Vinyl Chloride	5.6	93	0.17	2.8

Notes:

- 1. United States Environmental Protection Agency's (US EPA) Vapor Intrusion Screening Levels (VISLs) are noted in the table and can be found here. The term "Vapor Intrusion Screening Levels" or "VISLs" is used as a generic term for regulatory standards.
- 2. The West Virginia Department of Environmental Protection (DEP) does not have stand-alone vapor intrusion guidance and defaults to US EPA guidance.
- 3. Site-specific evaluation or mitigation is required if the VISLs are exceeded. More information about West Virginia DEP air quality guidance can be found here.
