## Notes:

1. The Rhode Island Department of Environmental Management (DEM) does not currently have vapor intrusion screening levels and defaults to the [Massachusetts Department of Environmental Protection \(MDEP\) guidance](#) according to the DEM. The term “Vapor Intrusion Screening Levels” or “VISLs” is used as a generic term for regulatory standards.
2. The United States Environmental Protection Agency’s (US EPA) Vapor Intrusion Screening Levels (VISLs) link is included [here](#) for reference.
3. Site-specific evaluation or mitigation is required if the VISLs are exceeded. More information on Rhode Island’s air quality regulations can be found [here](#).
