Notes:

1. Louisiana Department of Environmental Quality (DEQ) vapor intrusion screening levels are noted in the table and can be found [here](#) for sub-slab. The term “Vapor Intrusion Screening Levels” or “VISLs” is used as a generic term for regulatory standards.
2. The United States Environmental Protection Agency’s (US EPA) Vapor Intrusion Screening Levels (VISLs) link is included [here](#) for reference and the Louisiana DEQ defaults to US EPA indoor air VISLs.
3. Site-specific evaluation or mitigation is required if the VISLs are exceeded.
