

# Florida

	VAPOR INTRUSION SCREENING LEVELS ( $\mu\text{g}/\text{m}^3$ ) <sup>1, 2, 3</sup>			
	Sub-Slab Residential	Sub-Slab Industrial/Commercial	Indoor Air Residential	Indoor Air Industrial/Commercial
<b>Benzene</b>	3.1	15.5	0.31	1.55
<b>Tetrachloroethylene</b>	NC <sup>4</sup>	NC	NC	NC
<b>Trichloroethylene</b>	NC	NC	NC	NC
<b>Vinyl Chloride</b>	NC	NC	NC	NC

Notes:

1. The Florida Department of Environmental Protection does not have vapor intrusion screening levels except for certain chemicals associated with petroleum products. Those can be found [here](#). The term “Vapor Intrusion Screening Levels” or “VISLs” is used as a generic term for regulatory standards.
2. The United States Environmental Protection Agency’s (US EPA) Vapor Intrusion Screening Levels (VISLs) link is included [here](#) for reference.
3. Site-specific evaluation or mitigation is required if the VISLs are exceeded.
4. NC = No Criterion
