Notes:

1. Washington State Department of Ecology vapor intrusion screening levels are noted in the table and can be found [here](#). Method B levels are applicable to any site, while Method C levels typically apply to industrial sites.
2. The term “Vapor Intrusion Screening Levels” or “VISLs” is used as a generic term for regulatory standards.
3. The United States Environmental Protection Agency’s (US EPA) Vapor Intrusion Screening Levels (VISLs) link is included [here](#) for reference.
4. Site-specific evaluation or mitigation is required if the VISLs are exceeded. More information on vapor intrusion guidance can be found [here](#).
