

Florida

	VAPOR INTRUSION SCREENING LEVELS ($\mu\text{g}/\text{m}^3$) ^{1, 2, 3}			
	Sub-Slab Residential	Sub-Slab Industrial/Commercial	Indoor Air Residential	Indoor Air Industrial/Commercial
Benzene	3.1	15.5	0.31	1.55
Tetrachloroethylene	NC ⁴	NC	NC	NC
Trichloroethylene	NC	NC	NC	NC
Vinyl Chloride	NC	NC	NC	NC

Notes:

1. The Florida Department of Environmental Protection does not have vapor intrusion screening levels except for certain chemicals associated with petroleum products. Those can be found [here](#). The term “Vapor Intrusion Screening Levels” or “VISLs” is used as a generic term for regulatory standards.
2. The United States Environmental Protection Agency’s (US EPA) Vapor Intrusion Screening Levels (VISLs) link is included [here](#) for reference.
3. Site-specific evaluation or mitigation is required if the VISLs are exceeded. Refer to the Florida Department of Environmental Protection [Procedures and Guidance Documents](#) for more information.
4. NC = No Criterion
